- take the vision test between 10:00 am and 2:00 pm. Illinois law requires seniors age 75 and older to take a road test and a vision test each time they renew their licenses. These seniors who pass the vision test at Super Senior Day have up to 90 days to take their road test without needing an additional vision screening.

- secure a free, non-expiring Illinois photo identification card between 9:30 am and 2:30 pm. Residents age 65 and older must provide proof of birth date. This can be done with a valid Illinois driver's license. Seniors who do not have a driver's license should bring a valid passport or a certified copy of their birth certificate, their Social Security card with signature, and one additional form of identification such as a voter registration card, a utility bill, or another piece of mail with their current address.

- renew their driver's license (seniors age 74 and younger) between 9:30 am and 2:30 pm. The renewal fee is \$10.00 (a four-year license) for seniors under age 69 and \$5.00 for seniors age 69 and older.

Appointments are not required to participate in the Super Senior program. However, driver's license renewals and identification card photos are limited to 100 participants on a first come, first serve basis. Additional information is available from West Suburban Senior Services, (708) 547-5600, and the Illinois Secretary of State, (800) 252-2904.

**Sodium Alternatives**

**W**hich food is higher in sodium?  
 □ Five saltine crackers or one slice of American cheese?

- A fast food milkshake or fast food French fries?
- Old-fashioned oats or one packet of instant oatmeal?
- Chicken noodle soup (1 ½ cups) or ½ teaspoon of table salt?

Answers:

American cheese: One slice of American cheese contains about 450 mgs of sodium; the five saltine crackers contain about 180 mgs.

Milkshake: A fast food milkshake contains 300 mgs of sodium; regular size fast food french fries contain about 110 mgs.

Instant oatmeal: One packet of instant oatmeal contains about 285 mgs of sodium; old-fashioned oats contain less than 5 mgs.

Soup: One cup of soup contains about 1,100 mgs of sodium. The ½ teaspoon of table salt contains 1,050 mgs.

Unless a product is a low-salt or no-salt-added item, the more it has been processed, the more salt it contains. However, just because foods are low in salt, they don't have to lack flavor. Spices and herbs can be added to food instead of salt. Here are some suggestions for

*Meats* Paprika and parsley flakes add color to light meats such as pork, chicken, and fish. Celery seed, garlic and onion powder, curry or chili powder offer flavor and color to all types of meat.

### Stretching Your Food Dollar

There are many ways to stretch your food dollar in the grocery store. You can take a list, buy foods in season, use coupons, and buy store brands. However, meat is often the most costly part of a meal, so how can you stretch meat to serve more people?

One of the best ways to stretch meat dishes is to add grain products. Use more bread, macaroni, and rice to extend a small amount of meat. For example, serve a chicken stir-fry over rice, creamed turkey over noodles, or beef stew over corn cakes.

Fruits and vegetables also extend meat dishes. Lettuce, green peppers, tomatoes or celery can be added to small amounts of tuna, chicken or turkey to make salads. Fruits --- such as apples and pineapple --- can be added to meat to make such dishes as ham and fried apples or sweet and sour pork. Legumes --- such as pinto beans, lentils or navy beans --- extend soups, casseroles and stews.

Eggs and cheese also replace or extend a small

amount of meat. Shredded cheese can be added to soups, sandwiches, and casseroles. Add chopped or sliced hard-boiled eggs to salads and casseroles.

### Ways to Increase Calcium in Your Diet

It is well known that calcium is needed for bone growth. In fact, most of the calcium in the human body is found in the bones. Even after bones have stopped growing, calcium is needed. A very small – but vital – amount of calcium is found in the blood. Calcium helps blood to clot, muscles to squeeze and relax, and the heart to beat at a steady rate.

Adults need three to four servings of calcium daily. Common calcium servings are 1 cup milk, 1 cup yogurt, 2 cups ice cream, 1 3/4 cups cottage cheese, and 1 1/2 ounces of cheese.

Here are some additional ways to increase calcium in your diet with yogurt:

- Use yogurt instead of milk with cold cereal such as Grape Nuts.
- Substitute yogurt for the second cup of water in gelatin.
- Make dips, salad dressings, and vegetable sauces from yogurt.
